

[illegible]

5 particularly best suited for applications where high
precision and high cleanliness are required. The hologram-
recording dry plate comprises a substrate feeding means for
feeding a substrate, a film feeding means for feeding a
sheet-cut form of film having a separator, a separator
10 releasing means for releasing the separator from the thus fed
film, and a lamination means for laminating the film from
which the separator is released on one surface of the thus
fed substrate from the side of the film from which the
separator is released.
